

Testimonials:

Bill Jolly

3 time Emmy Award winner. Composer for The Paperboy and The Vampire Huntress

“ProjectSAM has created the most significant and useful software tools ever available for a music composer! I am currently using Symphobia 1, 2 and True Strike to create the music scores for 2 major release films, 2 independent films and 2 new television series to be released in 2012. Film directors can ask for music to be composed overnight or in an hour. Whatever you compose HAS to sound good, be flexible and be delivered fast. There is NO other way to create original, cinematic, complex, quality sounding orchestral scores on a deadline than with ProjectSAM products. The detail is impeccable, the programming is genius and the instruments sound unbelievably real.”
